

**Position Transducers  
with mounting clamps  
potentiometric  
up to 300 mm, IP67**

Series TX2

**Special features**

- compact dimensions  
Ø 16 mm
- protection class IP67
- very long life (depending on application) up to 50 million movements
- resolution better than 0.01 mm
- outstanding linearity up to ±0.05 %
- suitable for harsh environmental conditions (humidity, oil, dust)
- cable or connector version available

High protection class and very compact dimensions characterize this cost effective transducer.

The heavy-duty design with metal flanges and double sealed actuating rod allows a variety of applications even under adverse conditions like e.g. dirt, dust and humidity.

The adjustable fixing via mounting clamps makes a variable and simple mounting of the sensor possible, particularly for industrial applications.

The electrical connection can be made via a radial plug connector or a radial cable.

For transducers with or without return spring and mounting clamp, bushing mount or flange plates, please see separate data sheets TEX.

Description	
Housing	aluminium, anodized
Mounting	see drawing
Actuating rod	stainless steel (1.4305), rotatable, external thread M5
Bearings	sintered bronze bush
Resistance element	conductive plastic
Wiper assembly	precious metal multi-finger wiper
Electrical connections	3-pin round connector M8x1
	4-wire PUR-cable, 4x0.14 mm <sup>2</sup> , shielded, 2 m length

Protection class	IP67 DIN EN 60529 (use connector with IP67 or higher) The protection class IP67 was determined as fabricated condition under the following terms (DIN EN 60529): 1 m water depth, duration 0.5 h Abrasion of rod sealing depends on application and cycles. Please pay attention to the instruction manual before starting up.								

\*) Depending on the environmental temperature and standstill time, the necessary force for the initial operating of the push rod can increase.

## Mounting Instructions

A ball coupling is recommended for backlash-free and side load-free operation to compensate misalignment between transducer axis and the moving part.

## Important

All values specified in this data sheet for linearity, lifetime and temperature coefficient are only valid for a sensor used as a voltage divider with virtually no load applied to the wiper ( $I_e \leq 1 \mu A$ ).
